FLOOR LOCKS

Constructed of heavy-duty cast steel with a bright zinc-plated finish that will prohibit rust and provide for an attractive appearance. The top plate features slotted mounting holes for attachment to a larger number of bolt patterns. The lock pedal is large and allows enough clearance for use with steel toe work boots.

Adjustable-Height Floor Locks

Type A

Provides uniform locking and safer unlocking force for better ergonomic operation. Take-up slack when casters wear down. Easy to make up for variations in overall caster height differences. Keeps unit working properly as spring and pad wear over time. Unnecessary to shim casters to fit floor lock. Lower inventory costs, storeroom only needs to keep one model on the shelf. The easy-to-operate release pedal is painted red for better visibility.
