CAM LEVERS

Aluminum

Internal Thread

New!

Sale Price
As Low As **\$6⁹⁹**

Cam lever handles allow for quick fastening and unfastening without the use of tools. They thread in like a regular fastener, but for the final clamp action, the cam handle is simply pushed downward. They are constructed of cast aluminum and the washer is fiberglass reinforced plastic.

ADJUSTABLE CAM LEVERS

Aluminum

External Thread

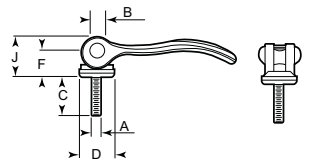

Sale Price
As Low As **\$8⁹⁹**

New!

Adjustable cam lever handles are just like the original cam lever except that the threaded stud can be adjusted with a flat head screwdriver. This allows the handle to be in the optimum position at all times.

Steel Bar Clamps

Sale Price
As Low As
\$9⁹⁹

Used by homecrafters, cabinet-makers, woodworkers and metal-workers. The sliding head is threaded to accommodate the screw. All adjustments are made in the moveable sliding head, making this style fast-acting, easy to open and close and suitable for "close quarters" clamping. Strong, light-weight steel bars are rust-resistant. Multiple-Disc-Clutch holds securely at any point along the bar.

VERTICAL HANDLE HOLD-DOWN CLAMPS

Series TC-2002, 2007, 2010

Sale Price
As Low As
\$11.99

Now you can save valuable space in all your applications without sacrificing holding capacity or clamp performance. The open "U" bar has a knob on the end to prevent the spindle from slipping off the end of the arm. Unique design delivers greater hand clearance in the open position, eliminating pinch points and improving safety and ergonomics. Clamp comes complete with ergonomic handle grip, two flanged washers and spindle assembly ("U" bar models only). All "S" bar models supplied with bolt retainer.

FIXTURE CLAMPS

Save
10%

The Mitee-Bite™ clamping system combines strength, versatility and performance with economy and ease of use. Consisting of a cam action socket cap screw with a brass hex washer, set ups are simplified even for hard to hold parts. Its small size allows more parts per load on multiple series jobs. The low profile makes programming easier because there are no clamps to jump over. Fast to use (just 1/4 turn of screw loosens clamp) and no loose parts to set up each time. Economical— all six sides of the hex nut can be used. Available in six sizes for use on multiple part fixtures. Metric sizes are in millimeters. MB-10203 and MB-50207 are stainless steel.

WHEEL CHOCKS

Used for wedging and blocking tires to restrict movement of the wheel while vehicle is being loaded or unloaded at the dock for OSHA compliance.

Sale Price
As Low As
\$15⁹⁹

Molded Rubber
Type A & B - Made of nylon reinforced molded rubber provides maximum grip traction. Rubber resists tearing, abrasion, and ozone weathering. Safety engineered to minimize sliding.

Type C

Laminated
Type C - Made of cord reinforced serrated rubber on steel rods to provide a sure grip on concrete or paved surfaces. Large handle allows easy transport and placement of chock.

Type D

Molded Urethane
Type D - Bright orange for greater visibility. Incoming and outgoing drivers can easily see chock for added safety. Safety tread on chock face provides better grip and reduces slippage.

Type E

Extruded Aluminum
Type E - Allows easy handling with high tensile strength. Serrated surface grips tire, and triple-edged bottom grips ground.

Type F

Heavy-Duty Steel
Type F - Made of high strength annealed ductile cast iron. Maximum traction on any surface. Bottom teeth grip securely, resist slipping. Grip slot for easy pickup and positioning.

Type G

Security Chain and Hanger
Type G - Discourages theft and misplacement of wheel chocks. 15 ft. chain attaches wheel chocks to the hanger which bolts directly to the dock, securing chock permanently to the dock.

GAS SPRINGS

Fixed Force Gas Springs

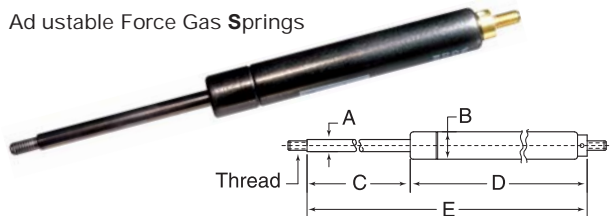

Patented multi-lobe seal significantly reduces gas leakage, tolerates shaft imperfections, vibrations and wide temperature variations. Body is made of heavy gauge steel and shaft is chromium plated steel. All have M6 x 1.0 threads. Three styles of end fittings are available below to fit these gas springs. Must be ordered separately.

**Length including end fittings (center to center)

Adjustable Force Gas Springs

These adjustable gas springs are the perfect solution for small volume design or replacement applications, as the need to calculate the exact force required is eliminated. Each gas spring is charged at the factory to its maximum force value. Once installed in an application, a simple allen key (included) adjustment can be made to reduce the gas spring force, until the desired application function is reached. Manufactured from specially designed seals, nitrotec finished rods and powder epoxy paint finished tubes for maximum life and service. To order a complete gas spring, select a spring from the table below, then specify which end fittings you need. (Two end fittings per gas spring.)

BEARINGS

Dri-Plane™
Bronze Sleeve Bearings

No Oil or Grease Needed for Lubrication

Expanded Line

"Dri-Plane™" bearings are produced to the exact standards of our SAE 841 Powdered Metal bearings, however, they have a graphite-based dry lubricant built right into the walls of the bearings. There is NO OIL or GREASE needed for lubrication, therefore, cleaner with no out gassing, and can operate in temperatures -30°F to + 700°F. They are ideal for furnace and oven applications. Also food processing and electrical equipment, exercise equipment, pharmaceuticals, vacuum processes, and glass manufacturing to name just a few.

MICROMETERS

**Digimatic Micrometers
293 Series**

With Dust/Water Protection Conforming to IP65 Level

- IP65 protection level, enabling use in environments exposed to cutting oil, etc*
- Measurement data output function is available with a water-resistant connection cable
- Auto power ON/OFF function
- Certificate of inspection** is included (50mm/2" or less range models)
- With a standard bar except for 0-25mm/0-1" model
- Supplied in fitted case. Plastic case up to 150mm/6", Wooden box over 150mm/6"

*Anti-corrosion treatment is required after use

**It is not the type used to obtain calibration certificates

MACHINIST'S CALCULATOR

Sale Price
Cat. No.
BEQTIS-MC-20
\$38⁹⁵

Determine the best machine speed and feed rates for all tools and material accurately with complete portability. Modern high-speed equipment combined with vastly superior tools yield production and quality advantages like never before. The machinist's calculator provides operators a hand-held device to determine startup parameters in the machine/tool/material equation. Achieve optimum production; minimize tool damage and wasted pieces. Built-in formulas return proper RPM, SFM, IPM, FPT, and CT (Cut Time) for all operations on all kinds of set-ups for machine, materials and tools. Calculator has prompting formats and yields time estimates. Perfect educational tool that fits in palm or pocket.

LEGENDARY DESIGN

Gerber Carnivore Blood Tracking Light™

Sale Price
Cat. No. BEQ180366
Only \$49⁹⁹

The Gerber Carnivore Blood Tracking Light™ has been calibrated across multiple light spectrums in a way that makes the red of blood appear to virtually jump off the ground. A toggle switch lets you operate back and forth between the TRAX LED and the 45 lumen Xenon light. The Carnivore Blood Tracking Light™ combines bright xenon light with TRAX blood tracking technology. If you're the type that likes even your ammo to be camo, the Mossy Oak Carnivore is the blood tracking light for you! Mossy Oak style camouflage has been added to all parts of the light.

FLASHLIGHTS

Key Features

- Light Source Type: One xenon lamp, eight 5mm L.E.D.s
- Output Color: White, Blue/Red
- Output Color Modes: Xenon, Trax
- Output Lumens: 45
- Illumination Distance: 325
- Housing Material: Plastic

GERBER
LEGENDARY DESIGN

Gerber Cornea Torch™

Sale Price
Cat. No. BEQ180367
Only \$19⁹⁹

This stylish, rugged metallic flashlight features adjustable beam functionality, an anodized aluminum housing, and boasts a 40% longer burn time and a 15% longer effective range than its closest competitors. The adjustable beam offers full illumination at its center (no black hole in the middle). The rear tail cap has a lanyard hole and houses the on/off button. Powered by two AA batteries included.

Coiled Hose Polyurethane Air Hose Assemblies

HOSE

New!

Sale Price
As Low As
\$13⁹⁵

Polyurethane air hose assemblies are lightweight and highly kink and abrasion resistant. They will withstand the rigors of tough industrial environments while maintaining their resiliency over a long period of time. Resistant to most oils and fuels. Features include: straight tails that provide built-in whip hose and reusable fittings.

Thermoplastic Hose

New!

Sale Price
As Low As
\$15⁹⁵

Thermoplastic combines prime PVC with special additives allowing this hose to resist long term deterioration caused by exposure to air line lubricating oils. A tough cover protects against scuffs, cuts and abrasions while the rayon spiral synthetic cord assures added strength, making this product a popular choice for industrial environments. Temperature range -20°F to +150°F; working pressure at 70°F 300 PSI
